

Hygiene perfected: effective immediately, one disinfectant with five advantages is sufficient: DISIFIN®-dent.

Want to dose simply and disinfect so efficiently?

Especially in dental medicine DISIFIN® proves its superiority as a disinfectant. Why not test it yourself!

## DISIFIN®-dent is

1

### SAFE TO DOSE AND AT THE SAME TIME SIMPLY TO HANDLE

Because DISIFIN®-dent dissolves quickly in water and the optimum agent concentration is immediately available.

2

### IDEAL, REGARDING THE STOCKKEEPING

Because the concentrated agent is available in space-saving tablet form.

3

### EFFECTIVE AGAINST YEASTS, FUNGI, BACTERIA AND VIRUSES

Numerous experts' opinions verify the complete spectrum of impact.

4

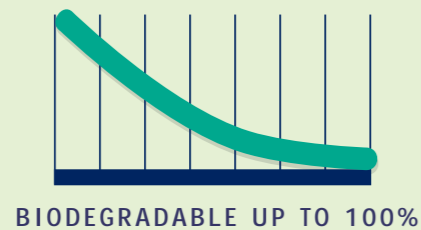

### RELIABLE PREVENTION OF RESISTANCE FORMATION

Because DISIFIN®-dent completely oxidizes all micro-organisms, no resistance formation is possible.

5

### BIOLOGICALLY LOGICAL, AS IT IS BIODEGRADABLE BY UP TO 100%

DISIFIN®-dent completely biodegrades in nature within a few days. The formation of AOX-compounds is evidently neglectably small.

AND ITS SO EASY AND SAFE  
Dissolve DISIFIN®-dent-tablets in water and simply rinse, spray or atomize.

### JUST GIVE US A CALL

If you would like to know more about the new disinfection agent, don't hesitate to call our hotline. Extensive technical expert's opinions, examinations and your personal test-pack are already ready for you.

Brand-new! The solution for all surfaces:  
Dose simply. Disinfect efficiently.

Drastic against viruses, bacteria, yeasts and fungi. And thus optimal.

In dental practices: hygienic, weak odour and leaves no film.

The highest standards of hygiene are required in the area of dental treatment and prophylaxis. Precisely here DISIFIN®-dent is proven to be a very strong disinfection agent, which destroys micro-organisms quickly and reliably way and removes unpleasant smells.

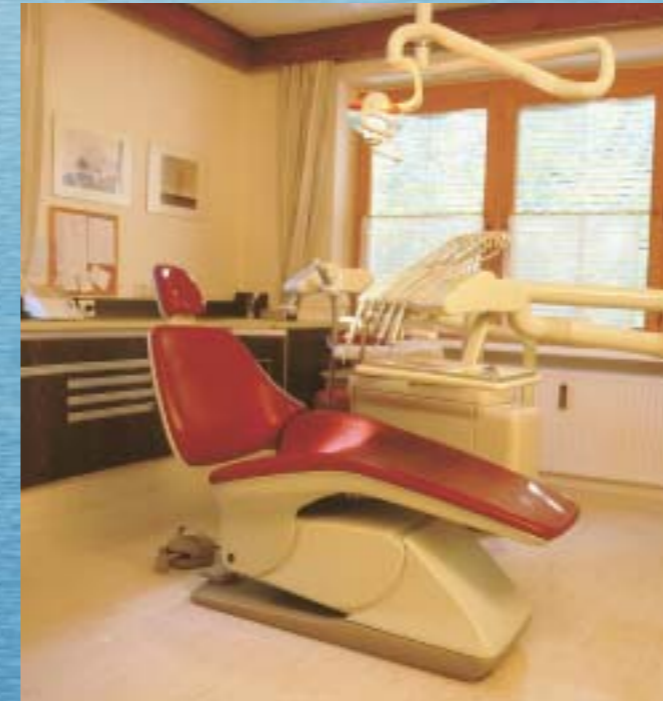

DISIFIN®-dent is absolutely neutral in taste with low smell and is biodegradable by up to 100%.

DISIFIN®-dent is a new disinfection agent in tablet form. Whether in hospitals, operating theatres, dental practices or in dental laboratories, poor hygiene can promote the growth of pathogenic germs, which can lead to dangerous infections in both patients and personnel. The most effective prevention is offered by a disinfection agent, which can be handled safely and easily. DISIFIN®-dent is quickly and reliably effective in low concentration and comes up to modern demands regarding effective disinfection. The tablet form cuts out risks of over- and underdosing.

Effective disinfection is a fundamental requirement for working in a range of applications in dental medicine and dentistry. Blood proteins are ideal substrates for microbial growth. Therefore a disinfection agent is predestined here, which destroys quickly and reliably micro-organisms. DISIFIN®-dent masters its task with particular success and results in a safe and complete deactivation of all viruses.

Mainly efficient against persistent viruses and bacteria.

Mild to the lab, but not to the germs.

Pathogenic micro-organisms can be effectively destroyed by using DISIFIN® dent in dental practices and dental laboratories. The transfer of infections between dental practices and dental laboratories is guaranteed to be stopped by using DISIFIN® dent when making impressions and when fitting dental prostheses. Also DISIFIN®-dent is even cold-resistant and can be used in the temperature range from 4°C to 70°C.

In areas where many people carry a wide range of germs, a disinfection agent is called for that not only kills micro-organisms effectively but is also gentle on all equipment. DISIFIN®-dent is kind to all wooden and plastic surfaces, at the same time destroying even persistent micro-organisms a short time, thus ensuring reliable protection against infections.

Hygienical – quick and safe.

The multi-talent throughout dental practices and in dental laboratories.

One of the outstanding characteristics of DISIFIN®-dent is its longstanding efficiency even after several days. Also, DISIFIN®-dent is cold-resistant and works already at 10°C. DISIFIN®-dent causes no damage to materials, rinses off clearly and guarantees a reliable disinfection everywhere.
